## Skating

« [back to the kindercenter's activities](#)

### What is skating

universal sport that requires coordination, strength, agility, flexibility, endurance, but also a sense for music and dance. Air in the ice rink is dustless, and this type of air conditions (after consultation with a specialist doctor) are **suitable for allergy sufferers or asthmatics**. Movement in the cold temperatures is beneficial to become hardened and to increase lung capacity. For these reasons, skating is one of the best types of physical exercises for children.

### Why = reason to decide

**Regular exercise in cold and wet:**

- helps to become hardened and support the immune system
- appropriately stimulate breathing apparatus, and therefore facilitates breathing
- have positive effect on respiratory problems and allergies

## How

Skating is not only the basis for the two most popular winter sports – ice hockey and figure skating, but also one of the fundamental locomotion that children should master in early childhood. In our course, children are **conducted by the expert guidance** and **learn the proper technique of** skating:

- skating forward – two legs, one leg, forward crossover
- skating backwards – two legs, one leg, backwards crossover
- stop forwards and backwards
- turns

Teacher always takes into account the child's ability and his age, while competitions and games make part of each hour. During the first class, children are divided into groups according to age and performance, so that their progress was smooth and adapted to the abilities of the child.

**Conditions:** Skating courses we will **start in March 2011** . We will notify you by phone or mail a specific date for the start of the course. We will meet **2times per week** . The course has **13 sessions** .

Courses open to children aged from **4** years. Maximum capacity is **10 children** in one course.
